# Introduction

It is our great honor and pleasure to render you an opportunity to understand and evaluate our potential capabilities and qualification through our performance of long-term and large projects since establishment of our company in 1986.

As one of the leading specialized erection contractors for instrumentation and electrical mechanical works covering supply, supervision, erection, test / commissioning and operation & maintenance, we have made considerably outstanding achievements in the construction of plants for instrumentation and electrical mechanical home and abroad.

By virtue of our highly qualified construction ability based on good workmanship and high reputation from our customers, we can assure that a project will be completed on time within the budget and with the quality parameters originally established for it.

We hope that this company profile will meet your requirements and will lead both of us eventually to the opportunities to cooperate.
